## Main function

- 1** Shape detection:  
Before massage,system detects shape of user
- 2** L guide rail  
Guide rail fits human's S type curve,and L type guide rail is super long with 120cm massage distance.
- 3** Zero gravity  
Imitate zero gravity of space capsule,relax person fully.
- 4** Shortcut key  
Easy operation,easy to understand.
- 5** Powerful motor  
MAGUNES special motor is designed by rich experience and performances,with strong power and excellent quietness.
- 6** Flexible airbag  
Airbag with strong function and wide moving range has realized stretching exercise of people,helping user to keep slim body.
- 7** Hot compress(Waist)  
Advanced carbon fiber heating technique warms user's feet,legs safely and high efficiently.
- 8** Arm&hand massage  
Hand and front arm can be massaged to promote blood circulation.

## Part name&function

### ● Chair

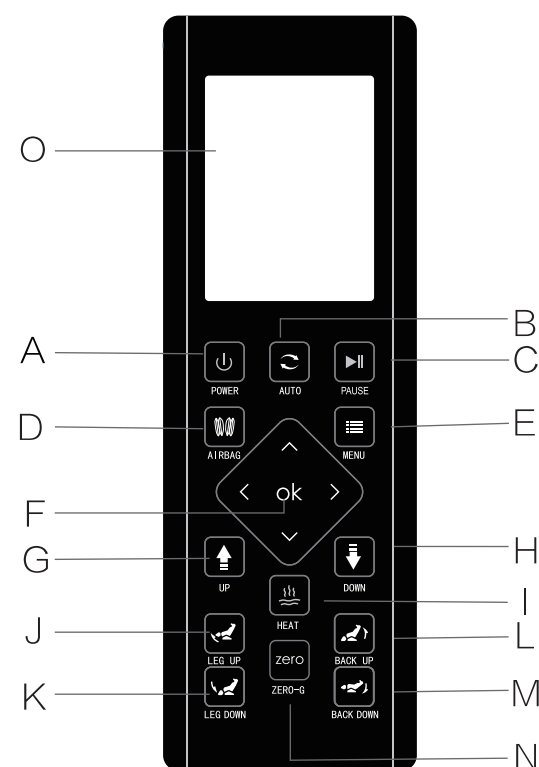

● Power cord and power socket

● Main power switch

## Confirm the fabric

Make sure if the fabric is damaged according to the following procedures before use.

- ① Open zipper and back cushion from one side
- ② Put your hand between cushion and backrest to see if the fabric is damaged.

**Caution**

Before using the chair, confirm that whether there is damage in the material of the armchair or of other parts. In case of damage, even the smallest tearing, in the chair, please stop using it immediately, turn off the power switch, unplug the chair, and contact the customer service center. Never use the armchair with dismantled cushion or damaged material, otherwise there will be serious safety hazard.

## Adjust the chair

### Sitting in the chair

Under general circumstances, the rollers are laid folded at the upper waist of the backrest, besides, legrest declines to its lowest position. Please ensure the position of the rollers and legrest. If the rollers and legrest are laid other place, restart the chair, keep on waiting for the parts return to its initial position, then sit in the chair slowly. After using, slowly step out of the chair.

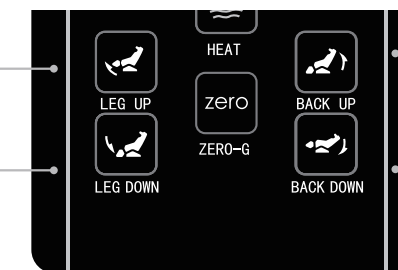

**Attention**

- Do not sit in the chair when legrest is rising, or after legrest rises, it may result in accident or reclining chair, causing personal injury.
- Raise the chair before using. Enjoy the massage from light massage course. Adjust the angle of your reclining angle according to your body figure.
- Do not stand on the legrest, it will break the legrest or even the whole chair.

## Adjustment of chair angle

Press this, legrest rises

Press this, legrest declines

Press this, chair rises

Press this, chair lies

Attention: When main power switch that is at the back of the chair is on, angle adjusting can still be done even not pressing On/Off button of controller. However angle adjustment is unavailable when in emergency stop condition.

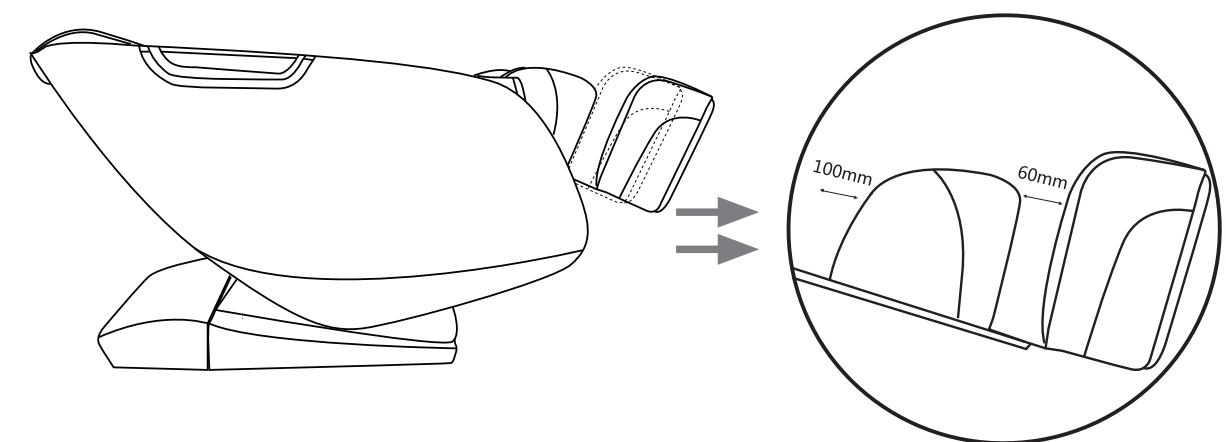

**Warning**

When adjusting angle, please make sure there is no person (Especially children) or pet around. Besides, there must be at least 30 cm space at the front or back of the chair, and there is no foreign matter in the way when rotating.

## Adjustment of legrest

Legrest can be lengthened if feet can not extend well. It can be lengthened by 160mm.

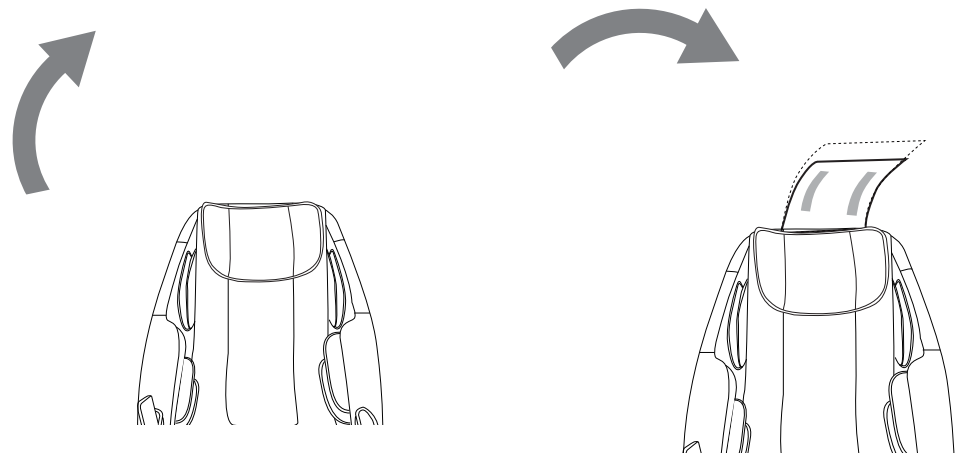

**Warning**

When lowering legrest, make sure there is no person (especially children) or pet around. Besides, hands or other object can not get stuck under the legrest.

## Adjusting the pillow

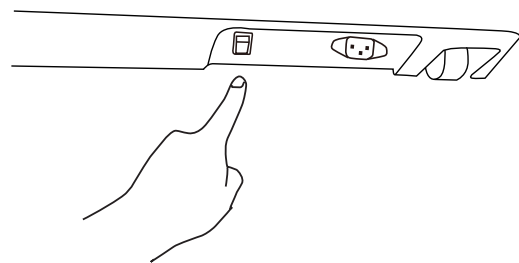

- If massage intensity of neck needs to be strengthened, please fold the pillow.

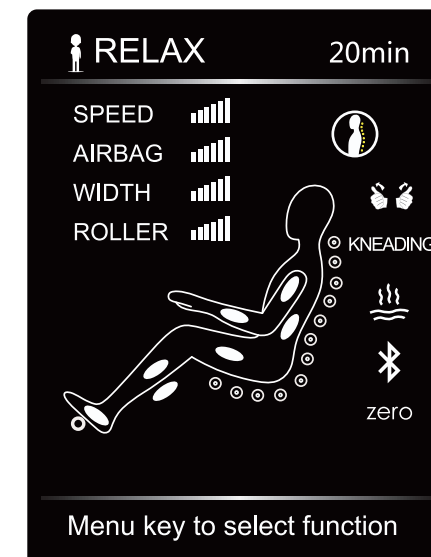

When pillow is folded, massage intensity of neck is strengthened, please keep massage time within 15 minutes. There is heavy object in the balancing bag of pillow, do not play with it, otherwise it may cause injury. Keep children away from this place

## Starts massage

### 1. Connecting the power, turn of main power switch

### 2. Press On/Off button, start auto program (Male mode)

You can also select the appropriate massage procedure by pressing the menu key or other function keys.

### 3. Feather key and confirmation key

Use feather key and confirmation key to go through menu, move cursor, and choose different program.

### 4. Stop key

Press this key, the machine stops all the massage function, press again, massage function is back.

## Music play

Active speaker is built inside the chair, user can play music by using bluetooth connection.

Massage with music around can promote massage effect

**! Attention** ● When playing music, turn down first, after adapting, slowly turn up.

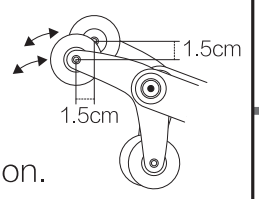

## After use

Rise the chair up and lower the footrest completely.  
Press ON/OFF key to turn off the chair, wait until chair gets back to its initial status.  
After airbags deflate completely, rollers get back to its initial position, sole massage stops, heating stops, then step out of the legrest. Do not stand in the legrest. Turn off main power switch, unplug power plug.

**! Attention** After you use the chair, turn off the main power switch, and unplug the power plug from the socket.  
→ Otherwise, accident or injuries may be caused by children or pets.  
After you use the chair, be sure to raise back completely and lower the footrest completely.  
After you use the chair, please clean it and place it in dry places.  
When unplugging the power cord, please do not pull it directly; instead, you should unplug it pinching the power plug.  
Please be sure to put the power cord away in prevention of tripping over.

## Troubleshooting

If there is still a problem after trying the solutions given in this troubleshooting guide, stop using the chair immediately to prevent accident or injury, and unplug the power plug from the wall outlet. Contact the vendor or your nearest service center for assistance.

Problem	Causes and troubleshooting	
The right and left rollers are out of alignment.		This is part of the design and is not a malfunction.
The roller moved to the bottom and stopped		
Noise during chair operation		
The rollers stop during the massage.	Sometimes when there is too much pressure to the rollers, they can stop moving temporarily. Slightly lift your body or lightly raise the Reclining Seat Back. (Be especially careful when a person who weighs 100 kg (220 lb) or more uses this chair)	If there is still a problem after the check, stop using the product immediately.
No power or the chair can't work after pressing the button	Check for the following: ① Is the power cord fully plugged into the wall outlet? ② Is the main POWER switch located at the front right of the chair set to ON? ③ Are you pressing two buttons at the same time?	
Abnormal heating on power cord and plug	Stop using immediately.	
Contact the vendor or your nearest service center.		Anyone other than an authorized serviceperson must not repair or disassemble.

## Safety check

### Regular Maintenance Will Preserve the Life of Your Chair

#### Have you experienced any of these problems?

- The chair does not start with the Main POWER switch set to ON.
- The power cord has been cracked or scratched.
- The power cord or plug becomes abnormally hot.
- The chair produces a burnt smell, abnormal sound or vibration.
- The auto timer function does not work in some cases.
- Other failures.

If you find anything listed on the left, stop using and unplug the power cord from the outlet to prevent failure or an accident. Be sure to contact the vendor or our service center for maintenance.

#### To use safely

The chair fabric (roller fabric) is a consumable part, and its service life is 3 years (conditions of use: two 15-minute sessions a day, every day). For safe use, periodic inspection by the vendor is recommended before the end of its service life.

\*Durable years vary depending on conditions of use.

\* After about five years of use, a professional inspection is recommended even if there are no symptoms or problems. For inspection fees, contact the vendor.

## Storage and care

### Storage

- After cleaning the dirt and dust, place the chair in a dry place
- If the chair is left unused for a while, please cover the chair to prevent from dust.
- Pets sometimes chew on power cord, so try to keep the pets away from the chair even when it is stored.

**Caution** Do not install the chair where it can come into contact with direct heat, such as direct sunlight or a radiator.

### Care and Maintenance

**Caution** ● When cleaning the chair, be sure to unplug the power plug from the wall outlet first. Do not plug or unplug the power plug with wet hands.

#### [Caring for the Back Pad and Covers]

Soak a piece of soft cloth in lukewarm water in which a small amount of mild detergent has been added. Then thoroughly wring it out before cleaning off any spots or grime.

**Caution** ● The fabric color can change if the chair is in contact with vinyl covers or wall coverings for a prolonged period of time.

#### [Caring for Other Plastic Parts]

Soak a piece of soft cloth in lukewarm water in which a small amount of mild detergent has been added, thoroughly wring it out, and clean off any spots or grime. Then wipe with a dry cloth so that no detergent residue remains.

**Caution** ● Do not use alcohol-based or other household cleaning products or abrasives because they can scratch or crack the finish or cause color to fade.

#### [Caring for the Remote Control]

Wipe dirt off the remote control with a dry cloth.

**Caution** ● Never use a moistened or wet cloth. May result in a mechanical failure.
