

## CEILING MOUNTING SIMPLIFICATION SET – SIMPLE AND USEFUL

Especially designed for INFRAPOWER infrared panels – THE ONLY SIMPLE AND AFFORDABLE SOLUTION IN THE MARKET.

General information before introducing the technical data of the ceiling mounting simplification set VCIR-ACC-04:

The main advantage of heating with infrared panels is that special areas/spaces can be heated up (and no need to heat always the whole room). Having this in mind, an infrared panel will often be mounted on the ceiling and this can be difficult to handle. Therefore, the ceiling mounting simplification set will make assembling easier and faster.

The new ceiling mounting simplification set is a very simple solution to do this, because an included template will provide all reference points. There are holes on the backside rails of our panels where the long screws have to be fixed with the hex nuts. Then the two ceiling profiles have to be fixed on the ceiling. Sliding in the panel until it's locked will finish the assembling.

### DELIVERY CONTENT (SINGLE PACKAGED):

- aluminum ceiling profile A
- aluminum ceiling profile B
- screws 4x50 SNK (4 pcs)
- flat washer M4
- screws M6x80 6-KT (4 pcs)
- hex nuts M6 (4 pcs)
- template for mounting

### THIS CEILING MOUNTING SET IS ONLY APPLICABLE FOR FOLLOWING STANDARD INFRARED PANELS:

- VCIR-60-60
- VCIR-60-90
- VCIR-60-120

### PACKING SIZE:

25x10x4 cm (LxWxH)

### WEIGHT:

net weight: 1 kg  
gross weight: 1.2kg
